To whom it may concern.

Farrans recently engaged Bridge Joinery to carry out all joinery works on a 6 million new build sports and leisure facility in Macduff ,Aberdeenshire.

As a company and on a personal note we would like to thank Stephen and Mark for the very high standard of finishing works carried out by Bridge joinery .

From the beginning to the completion of this project Bridge were a pleasure to work with . They quality of workmanship and management was first class . There were many hurdles to overcome during this project and Bridge overcame every problem they faced punctually, professionally without ever jeopardising the high quality of workmanship I came to expect .

Therefore I would have no hesitation in highly recommending Bridge Joinery to any main contractor looking for high quality joinery finishes on any future projects they may have.

Please feel free to contact me at any time should you require any further information

David Inglis

Construction Manager – Farrans Construction
